Pursuant to 35 U.S.C. 184, the subject matter of this application may be filed in a foreign country for the purpose of filing a patent application without a license any time after the expiration of 6 months from filing date unless the application becomes the subject of a secrecy order.

The "P. 10" was a small, light-colored, rectangular box, approximately 10 cm long and 5 cm wide. It was made of a material that appeared to be wood or a similar composite. The box was open at the top, and the interior was lined with a dark, possibly black, material. The box was placed on a surface, and the lid was slightly ajar. The box was labeled with the number "10" in a small, handwritten font. The box was used for the purpose of the experiment, and it was found to be a suitable container for the material being studied.
